## MONITORING SERVICE

ALARM & SENSOR MONITORING LONE WORKER SAFETY

208 N Main St, Souderton, PA 18964  
 P:215-703-6450 P:877-392-6450 F:215-723-9330  
 www.Towne.Services

Your organization might depend on the services of remote or on-location employees. These individuals are capable of performing at a high level with little or no supervision. But these lone workers can be presented with various safety concerns for both themselves and their employers.

If you're unable to pinpoint the exact location of your workers, how can you be sure that everything is okay? And employees who are always on the road or working in isolated situations often face additional hazards that do not exist in an office or a closely monitored facility. If something happens, there might not

be anyone nearby who can help. Emergency Alert from Towne Tracking Service is a state-of-the-art lone worker safety solution that combines the power of a smart phone with the response capabilities of Towne to provide extra

protecting and peace of mind. Running through a simple to use app on your employees phone, the lone worker can request help at the touch of the screen or if they do not respond at check-in, help will be summoned. The intuitive app monitors the location of lone workers in real-time and allows them to check-in safely once they have finished a lone working or travel session. Should the need for response arise, day or night, Towne is ready 24 hours per day, 7 days a week, 365 days of the year. The app has been designed for a simple user experience which means it is quick, easy-to-use and fits effortlessly into the working day. Plus, employees can only be tracked when they self-initiate a session in the app- so they are in control.

### Mobile Personal Emergency Response

#### On-The-Go Safety

Completely mobile PERS on the largest cellular network with GPS and network location services providing an approximate location and location history.

#### The Most Advanced Fall Detection

Detects falls with accuracy and minimized false alarms. Fall detection is based upon multiple motion sensors and proprietary algorithms. The Libris mPERS can often notify us of a fall, even if you are unable to activate the button.

### In-Home Emergency Response

The MXD is compatible with all telephones formats (including VoIP and cable). With an 80 hour back up battery, the smallest pendant in the industry and this unit's excellent microphone and speaker provide sound quality and clear two-way voice communication between your home and our Operations Center to help you hear and be heard during an emergency - this unit packs a big punch!

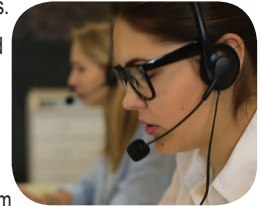

### TowneCare

#### DAILY WELL-CHECK CALLS

**What is a Well-Check Call?** Simply put, our operators or systems will make daily care calls to check in on a client. This can be once, twice or up to three times a day and can be customized to accommodate just about any schedule. If we are unable to reach, we would then call pre-arranged contacts to request that they follow up.

We can incorporate reminders into our calls or just simply offer a friendly voice. As with most any of our offerings, SERVICE is what we provide, customized to your needs.

Live Operator, Automated and Monitored Packages are reasonably priced completely customizable to suit any need.

All of our calls are from right here in our Souderton office. Maybe it's a reminder to take medication, maybe it's just a simple "How are you today?" Great for client satisfaction surveys! We are here to help - day and night, 24 hours a day, every day of the year.

### MedReady Inc. Automated Medication Dispenser Designed for persons taking scheduled medications.

The MedReady is a timed alarm system that provides scheduled medication dosages automatically & has both an audible alarm and light for hearing-impaired users. The dispenser holds up to 28 doses and can be programmed for 1-4 doses a day. Missed dosages can be sent via text or caregivers can be notified through our operators. Cellular version available.

We provide customized solutions for your business. Trust our expertise to give you peace of mind, knowing that we're taking care of your customers 24/7, every day of the year. Enjoy the benefits of increased productivity, efficiency and cost savings when you put our solutions to work for you!
